

Call for Nominations

7th Annual Awards for Exemplary Biosolids Management

The Water Environment Association of Ontario (WEAO) is soliciting nominations for the 7th Annual Awards for Exemplary Biosolids Management that recognize biosolids practitioners that go beyond the normal requirements and "raise the bar" in the practice of managing biosolids. The objective of the awards program is to promote excellence in biosolids management in Ontario. Two awards are given to recognize excellence for small (< 5 dry tonnes per day) and large (> 5 dry tonnes per day) biosolids generators. Within these categories the awards recognize excellence on the basis of contributions in one or more areas that include operating projects, technology development activities, research activities and public acceptance activities. A nomination package must be submitted to the WEAO for an organization to be eligible for an award. Nominations may be prepared by the proponent or by other supporting organizations such as engineers, consultants and agronomists. The Awards will be announced at the WEAO Annual Conference Awards Luncheon and will consist of a certificate and a plaque. The WEAO will also publicize the award-winning projects in the WEAO magazine INFLUENTS.

The deadline for submission of nominations for 2010 is Thursday March 4, 2010. Details of the requirements for the nomination package and the evaluation criteria can be obtained from the WEAO website (www.weao.org). Use this as an opportunity to get some good publicity for your biosolids management program!
